Education

PROFILE

Entry-level Frontend Developer proficient in HTML5, CSS3, JavaScript ES6+, and React.js. Experienced in working with APIs, version control (Git), and responsive design principles. Looking to contribute to real-world projects while expanding my skill set.

PERSONAL OR COLLAGE PROJECTS

My Personal Projects

- Built multiple responsive web applications using HTML, CSS, JavaScript, and React.js.
- Applied React Router for navigation and Redux for state management in multi-page apps.
- Uploaded images using Cloudinary and managed authentication with Firebase in select projects.
- Practiced version control using Git and GitHub, with clean code and frequent commits.
- Designed a personal portfolio website to showcase projects, skills, and contact information.

I MADE ECCOMERCE APPLICATION

- Tech Used: React, Redux, Bootstrap, Firebase, Cloudinary Built a fully responsive e-commerce website with category, price, and search filtering.
- Used Redux for managing products, cart, and authentication states. Implemented Firebase Auth (Email, Google) and Cloudinary for image uploads.
- Developed features like Add/Edit Product, Cart, and Order placement with success popup.

BLOG MANAGEMENT APP

- I have made the project, which has four sites: admin panel, mediator panel, public web, and backend that handles them all.
- The admin panel was made with normal React and Shadcn.
- The mediator panel was made with next.js.
- The public web was made with Astro.js.
- The backend was made with Nest.js with needed dependencies.
- This project has role-based authentication, JWT auth, Supabase (online DB), and PostgreSQL (local DB).
